DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a method for making a carbon fabric, classified in class 156, subclass 89.26.
 - II. Claims 16-18, drawn to a carbon fabric, classified in class 442, subclass 179.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. The product as claimed can be made by preparing a raw fabric obtained from raw fibers by knitting or by forming the fibers into a non-woven fabric. The product as claimed can also be made by preparing the fabric from fibers that have previously been carbonized.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. In the event that claims directed to the product are elected, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined. Therefore, upon the election

Art Unit: 1771

of Group II, rejoinder will be considered upon indication of allowable subject matter pursuant to MPEP 821.04.

5. A telephone call was made to Sheridan Neimark on 7/5/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
